RE: RFQ WSDOT Capital Facilities General Engineering Contract

Dear Consultant Services Office (CSO) and members of the selection committee,

TKDA is pleased to submit the following qualifications for the Capital Facilities General Engineering Contract (WSDOT). We fully understand the requirements defined in the RFP documents and the demands of the Scope of Work. We have carefully selected a full-service team with expertise for task orders and the local experience for the requirements of this contract. TKDA will serve as the prime firm with support from our subconsultant partners, including Stemper Architecture Collaborative, FSi Engineers, Shannon & Wilson, Confluence Environmental Company, Reyes Engineering, Bolima, and J B Iringan Consulting. We have worked on 20+ WSDOT projects over the past 15 years and understand the importance of being familiar with WSDOT standards.

The continuous maintenance and improvement of WSDOT's facilities and infrastructure is essential to keeping Washington moving. TKDA's team of engineers, architects, planners, and project managers understands this need and works every day with new and existing clients to help deliver projects that provide those necessary facility evaluations, maintenance upgrades, and facility improvements. Much of TKDA's project design experience is providing day-to-day engineering and architectural services for additions and modifications to existing facilities and infrastructure. Our firm recognizes first-hand the vital importance of a healthy and viable public transit system, and the need to increase the capacity of these networks. Beyond our passion and commitment to transportation infrastructure and facilities, we also offer tangible and important qualifications to meet your needs.

Your Knowledgeable and Experienced Partner. TKDA believes building and maintaining strong client relationships leads to better service. It keeps information flowing and smooths project deliveries. Our team goes deep to understand what our clients care about most. We engage multiple professionals across relevant design disciplines, and at every stage of a project. Our approach is proactive, keeping our clients' goals, timeline, scope, and budget in mind, while delivering excellent results. TKDA is large enough to provide a multi-disciplined, quick, and supportive response to any project, yet small enough to ensure personal attention and commitment to facility assessment, upgrade and maintenance projects from our dedicated personnel. Dan Munn, SE, will serve as Project Manager and the single point of contact for WSDOT. Dan will be responsible for managing the Contract Task Orders and ensuring the scope, schedule, and deliverables meet WSDOT's expectation. Dan has successfully completed design for over \$100 million of WSDOT projects in the last five years on projects of varying size and complexity. Dan is an expert in buildings and facility projects requiring multiple integrated disciplines.

Integrated Team Approach. The TKDA team not only brings a highly qualified integrated team of professionals, but a broad range of experience within the transportation industry. Our team has expertise in structural, civil, mechanical, electrical, technology systems, electrical/mechanical commissioning, architecture, landscape architecture, planning, traffic engineering, rail services, surveying and mapping, and water resource management. The project experience and references provided in our proposal are a small sampling of the transportation and infrastructure work TKDA has completed for more than a century. Our key personnel are supported by a strong team of passionate individuals who work daily to improve our nation's infrastructure across many sectors.

TKDA's team and experience is expanded by those subconsultant companies with which we partner. TKDA builds relationships with its partners the same way it does its clients, over the long term. TKDA views its subconsultant partners as an extension of its own in-house team and as such, holds our partners to the same high standards we hold ourselves. Our goal is that partner companies remain close resources for a long time, allowing our firms to expand each other's expertise and experience to strengthen each other's ability to deliver successful projects.

Let's Find Solutions. As an employee-owned firm, every team member is motivated to provide our clients with excellent service. We know delivering infrastructure projects is challenging, and TKDA takes ownership of providing inspired solutions to keep you coming back again and again, for years to come. TKDA's expertise working within active transportation environments will be key in providing an integral team solution for meeting the operational requirements of WSDOT.

Commitment to Safety. At TKDA, safety is paramount, ingrained deeply in our values and reflecting an unwavering dedication to team members, communities, and collaborative partners. Our safety practices come to life through active investments in tools designed for prevention, education, and accountability. We want every employee to return home safely each day. TKDA's outstanding historical safety performance reflects this commitment. We work with our clients to develop solutions to operate efficiently, with safety as a top priority. Our goal is zero injuries.

Commitment to Service. TKDA is committed to providing the professional services described in this qualification package throughout the duration of the term of service. We understand the varied nature of the potential scopes of work WSDOT is looking to execute. With the breadth of knowledge TKDA's team and trusted subconsultant partners bring, we can successfully execute a wide range of projects on behalf of WSDOT. TKDA holds many service contracts and has shown a commitment to those Client-Partners throughout our history. We intend to form the same relationship with WSDOT and its staff, while delivering services in a timely and cost-effective manner.

We have assembled experienced team members committed to working with WSDOT. These individuals are well-versed in transportation facility assessment, planning and design. TKDA is committed to the execution of work using the key personnel and subconsultants identified in our proposal, throughout the duration of the term of service.

Commitment to Disadvantaged Business Enterprise (MSVWBE) Utilization. Along with providing an exceptional level of service, TKDA is committed to exceeding WSDOT's 26% voluntary goal for MSVWBE usage, as established by each task order. TKDA has a history of exceeding its goals for MSVWBE usage on many past projects across a varied client base.

Commitment to Quality. TKDA is committed to delivering quality deliverables every time, despite the challenges budget and schedule can bring. TKDA is committed to meeting WSDOT's Quality Management System requirements through the use of a Quality Assurance/Quality Control (QA/QC) Plan specifically adapted to best meet the unique goals and requirements of WSDOT.

On behalf of the entire TKDA Team, thank you for the opportunity to provide our qualifications for your consideration.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Dan Munn'.

Dan Munn, SE
Project Manager
Northwest Regional Vice President

6. Contractor Certification - Workers' Rights

**CONTRACTOR CERTIFICATION
EXECUTIVE ORDER 18-03 – WORKERS’ RIGHTS
