

MicroStation 203 Course Details

Course Name

WSDOT CAE: MicroStation - 203 Sheet Development in ProjectWise

Description

This self-paced intermediate course expands on the sheet development production process covered in MS201 with the addition of ProjectWise Explorer (SS4 version). It incorporates steps specific to WSDOT ProjectWise workflows including use of an intermediate “container” file between base and sheets, and managing coordinately correct sheet files.

Learning Objectives

Upon completion of this course, the student will be able to:

1. Describe basic concepts of single sheet per file approach and benefits
2. Define when and why an intermediate “container” file is used
3. Create a plan set deliverable package including base files, container, and sheet files

Questions and Assistance

Contact a regional CAE Coordinator or HQ CAE HelpDesk [Contacts](#).

Learning Center Transcript

For WSDOT users, CAE does not provide credit in the Learning Center for this course.
