**AGENCIES:** Federal Highway Administration (FHWA) and Federal Transit Administration (FTA), Department of Transportation. **ACTION:** Notice of intent.

SUMMARY: The FHWA and FTA, in cooperation with Sound Transit (ST) and Washington State Department of Transportation (WSDOT) are issuing this notice to advise the public, affected Indian tribes and agencies that an environmental impact statement (EIS) will be prepared for improvements within the SR 520 corridor from Seattle to Redmond in King County, Washington. High capacity transit (HCT) alternatives across Lake Washington, including the SR 520 and I-90 corridors, will also be considered at a programmatic level.

## FOR FURTHER INFORMATION CONTACT:

SUPPLEMENTARY INFORMATION: The purpose of the proposed action is to improve mobility for people and goods across Lake Washington within the SR 520 corridor from Seattle to Redmond to address the following needs in the corridor. Land uses and transportation systems are not integrated in their planning and implementation; the transportation system suffers from extensive congestion; reliability and safety of the system are impaired; and neighborhoods, business centers and the environment are negatively impacted by

high traffic volumes.

Alternatives under initial consideration include: (1) No action; (2) maintain SR 520 as four lanes, but improve access, operation, and safety; (3) add one HOV lane in each direction; (4) add one HOV lane and high-capacity transit in each direction; (5) add one HOV lane and one general purpose lane in each direction; and (6) add one HOV lane, high-capacity transit, and one general purpose lane in each direction. Ĕach ''build'' alternative will also include Transportation System Management (TSM) measures, Transportation Demand Management (TDM) measures, bicycle and pedestrian facilities, and environmental and neighborhood mitigation and enhancement measures. HCT alternatives across Lake Washington,

including the SR 520 and I-90 corridors, will also be considered at a programmatic level.

Letters describing the proposed action and soliciting comments on the scope of the EIS will be sent to appropriate Federal. State, and local agencies. affected Indian tribes, and to organizations and citizens who have previously expressed or are known to have interest in this proposal. A public hearing will be held and notice will be given of the time and place of the hearing. A series of agency and public scoping meetings are scheduled to be held during July 2000. (See below for details.)

Each public scoping meeting will consist of an informal open house setting from 5-7 p.m. and a formal meeting format beginning at 7 p.m. The formal meeting will begin with a short presentation, after which, comments will be received in the group forum. A court reporter will be available to record oral comments in an informal one-onone setting, for the open house, and will also record the formal meeting and comments from individuals in the group setting.

Comments may be made at one of the following public scoping meetings.

### I. Background

A. 1998 Global Agreement

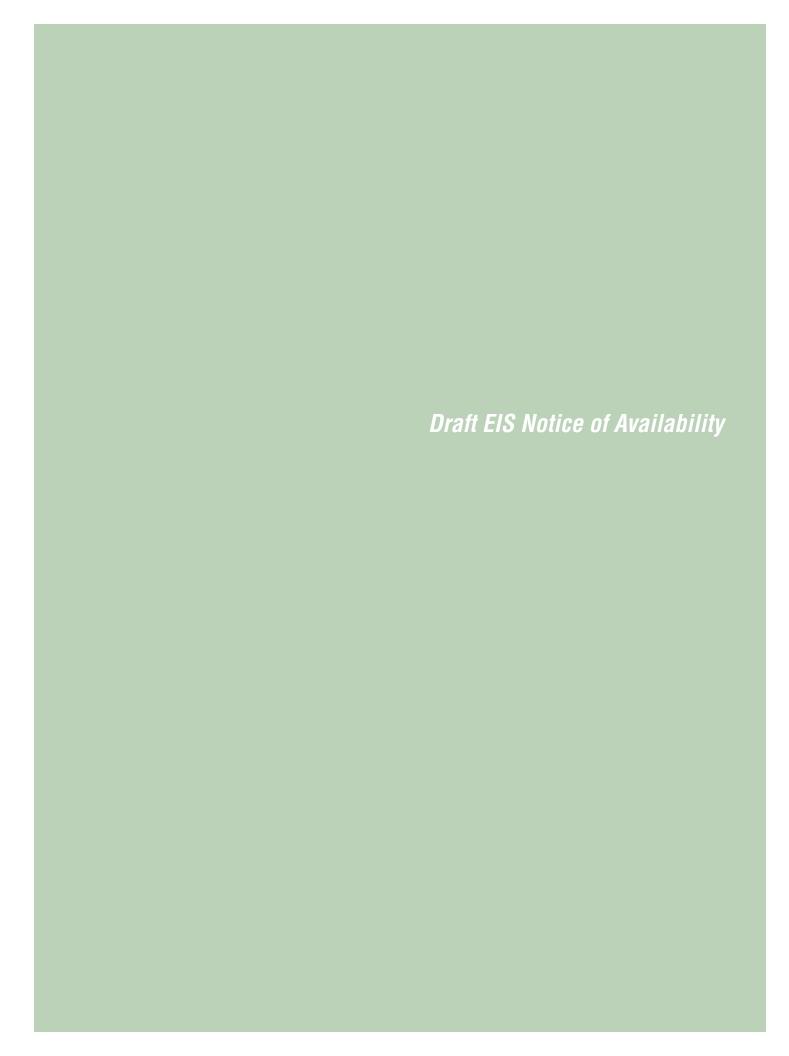

On June 25, 1998, the U.S. became the first signatory to the United Nations/ Economic Commission for Europe (UN/ ECE) <sup>1</sup> Agreement Concerning the Establishment of Global and Technical Regulations for Wheeled Vehicles, Equipment and Parts Which Can Be Fitted And/or Be Used On Wheeled Vehicles (the "1998 Global Agreement"). 2 The 1998 Global Agreement provides for the establishment of global technical regulations regarding the safety, emissions, energy conservation and theft prevention of wheeled vehicles, equipment and parts. 3 The Agreement contains procedures for establishing global technical regulations by either harmonizing existing regulations or developing a new regulation.

The establishment of global technical regulations is expected to lead to a significant degree of convergence in motor vehicle regulations at the regional and national levels. However, while in some instances the result may be the adoption of identical or substantially identical regulations at those levels, in other instances, the result may be regulations that differ but do not conflict with each other. While the Agreement obligates the Contracting Parties, under certain circumstances, to consider adopting the global technical regulations within their own jurisdictions, it does not obligate the Parties to adopt them. The Agreement recognizes that governments have the right to determine whether the global technical regulations established under the Agreement are suitable for their own particular safety needs. Those needs vary from country to country due to differences in the traffic environment, vehicle fleet composition, driver
