2024 Project Detail Report

(STIP Design and Construction Activities)

Washington

TTP Transportation Improvement Program (TTPTIP)

25 CFR 170.424

(a) Each year, FHWA will compile the approved TTIPs for all of the Tribes into one document called the TTPTIP. This document will identify all expected projects and activities over a four-year period and will be organized by fiscal year, State, and Tribe.

(b) FHWA and BIA will post the approved TTPTIP on their respective Web sites. A subset of the TTPTIP that identifies only design and construction activities will annually be provided to the pertinent FHWA Division office for further transmittal to each State Transportation Office/Department for inclusion in the STIP without further action per 23 U.S.C. 201(c)(4).

The TTPTIP is a financially constrained prioritized list of transportation projects and activities eligible for TTP funding covering a period of four years that is developed by BIA and FHWA based on each Tribe's submission of their TTIP or Tribal priority list. It is required for projects and activities to be eligible for funding under title 23 U.S.C. and title 49 U.S.C. chapter 53. The Secretary of Transportation reviews and approves the TTPTIP and distributes copies to each State for inclusion in their respective STIPs without further action.

Length: **0.02** Miles **County:** **Clallam**
State: **WA** **Construction Year:** **2020**

Comments: **Clallam County Public Works is the pass-thru local agency on this federal-aid project receiving FY2017 TTP Bridge \$1,000,000. Other federal funds include STPR \$500,000, STP-HIP \$43,272.00, and STPBR \$647,800 for a total of \$1,171,072.00 construction awards to the contract and \$20,000 to WSDOT oversight for a total project cost of \$4,559,440.31. PS&E \$599K has been completed in 2017. Reconstruction of existing bridge required a full replacement to correct seismic deficiencies, bankful width scour and narrow shoulders to match the Old Olympic Highway road width. Scope of work included removal of 12 seismically vulnerable columns from the floodway and replacement with concrete drilled shaft substructure; remove the narrow deck and install superstructure that matches the roadway width for the rural minor arterial, and improved floodway for anadromous fish.**
