Notes:

The missing numbers from this list include 314, 545, 572, 592 and 593. These numbers have been omitted because the properties to which they are assigned are located outside of the APE; regardless of NRHP eligibility, the buildings were surveyed in error.

Additionally, some property ID numbers belong to two addresses. This was not done in error, but was part of the SDEIS method of assigning the same property ID number to buildings located on the same parcel. This method was later changed for the FEIS, where each individual building was assigned separate ID numbers.

The numerical jump from the 600s to the 700s signifies a move from the Seattle portion of the APE to the APE at the Port of Tacoma, and the numerical jump from the 700s to the 800s signifies a move from the Port of Tacoma APE to the APE at the Port of Olympia.

Finally, there are an additional 79 properties that contribute to the Roanoke Park Historic District, which are not represented on this list, but are included in the total number of historic properties within the project's APE.
