

Project Name: _____

Project Number: _____

Asbestos Good Faith Inspection Compliance Form* for WSDOT Capital Construction Projects

Fill out Parts A, B, and C to complete this form

For any WSDOT capital construction project, the Project Engineer, Environmental Manager, Hazardous Materials Specialist, or AHERA Building Inspector must complete and sign this form that states either ACM may be disturbed by the project and an asbestos GFI will be conducted, **or** ACM is not expected to be disturbed and a project-specific asbestos GFI will not be conducted. A copy of this completed form (and the asbestos GFI report if one is required) must be provided as part of the bid package to notify contractors of the presence or absence of ACM prior to bid opening.

Part A – Projects that may disturb ACM

The project may disturb one or more types of structures that could potentially contain ACM. Check **all that apply**:

- Building
Some components of buildings may contain asbestos.
- Bridge
Some components of bridges may contain asbestos.
- Tunnel
Some components of tunnels may contain asbestos.
- Asbestos coated or lined metal or pipe-arch culvert constructed prior to 1990
Six coating treatment types were available design options. Treatment types 3, 4, and 6 contained asbestos.
- Asbestos cement pipe drain or perforated underdrain pipe constructed prior to 1990
In addition to concrete, vitrified clay, aluminum and steel pipe, asbestos cement pipe was a design option.
- Asbestos cement storm or sanitary sewer pipe constructed prior to 1990
In addition to concrete, vitrified clay, aluminum and steel pipe, asbestos cement pipe was a design option.
- Asbestos fiber bonded metal cribbing wall constructed prior to 1990
In addition to plain galvanized metal cribbing, asbestos fiber bonded galvanized metal was a design option.
- Other structure(s) known or suspected to contain ACM: _____
Consult ESO HazMat Program [ACM GFI Guidance](#) or contact [ESO HazMat Program](#) for support before selecting this option.

If any box in Part A is checked, an asbestos GFI is required and must be conducted by an accredited AHERA Building Inspector **unless** the Project Engineer, Environmental Manager, Hazardous Materials Specialist, or AHERA Building Inspector are reasonably certain that no ACM will be disturbed by the Work and fill out Part B below.

Part B – Statement of reasonable certainty of non-disturbance of ACM

The Project Engineer, Environmental Manager, Hazardous Materials Specialist, or AHERA Building Inspector have reviewed existing **objective data** and are reasonably certain that no ACM will be disturbed by the project. Check **one** of the following:

- Not applicable because one or more boxes were checked in Part A and an asbestos GFI will be performed.

*This form was written by the WSDOT headquarters Environmental Services Office Hazardous Materials & Solid Waste Management Program Manager (who is an accredited AHERA Building Inspector).

OR

- No structure types that could potentially contain ACM were checked in Part A.

OR

- Structure types that could potentially contain ACM were checked in Part A, but the Project Engineer, Environmental Manager, or Hazardous Materials Specialist are reasonably certain that no ACM will be disturbed by the project based after a review of existing objective data AND consultation with an accredited AHERA Building Inspector prior to making this determination. An AHERA Building Inspector can make this determination based on review of the existing objective data.

List the name/date of AHERA Building Inspector that was consulted prior to making this determination:

Name/Date: _____

Type(s) of **objective data** used to make reasonable certainty determination of non-disturbance of ACM.

Check all that apply:

- As-built information
 Maintenance records
 Safety Data sheets
 Geology and soil information
 Design plans and specifications
 Previously written asbestos GFI statements or reports
 Best professional judgment
 Other data: _____

Part C – Certification/Signature

To complete this form, the Project Engineer, Environmental Manager, Hazardous Materials Specialist, or AHERA Building Inspector must verify that to the best of their knowledge the information provided in Parts A and B above is correct.

Name/Title/Date: _____

Signature: _____

Questions?

Contact the [ESO Hazmat Program](#) if you have any questions about filling out this asbestos GFI Compliance Form or the corresponding asbestos GFI guidance or the corresponding asbestos GFI Policy in Chapter 447 of the WSDOT [Environmental Manual](#).
