

## *2024 ER Transportation Management Center Relocation Q&A*

Question - I have reviewed the RFQ and it appears that the scope would be for architecture/interiors only, is that correct? I want to make sure what consultants I include on the team.

Answer – WSDOT is in fact looking for M/E/P on this project. The note is on page 12 of the RFQ document.

For reference: Mechanical and Electrical engineering will consist of but is not limited to: M/E/P building component design, layout, and relationships of the various components interface with existing infrastructure.
